Abstract

A dowel gauge (1) comprises an angle section (2) with a first leg (3) and a second perpendicular leg (4) that are each provided with a bore (5, 6) to which a drill guide (9) is detachably fastenable from outside. Scales (12, 13, 14) are provided on the ends of the two legs (3, 4) and one long side of the first leg (3), respectively.
